

Maths revision strategies.

- Little and often – 15 minutes a day or every other day is much better for your brain than a solid hour or 2 once or twice a week.
- <http://mathsapp.pixl.org.uk/>
- For the more able - <http://bland.in/aqa.html>
- <http://corbettmaths.com/>
- Have specific targets – not “algebra” but “I want to be able to solve an equation with 1 variable”. This will enable you to track your progress more rapidly.
- Covey tests – check the board to see which tests are “2” or “3”. Revise these topics and then ask to do the test again. Ask your teacher if you aren’t completely sure of where the gaps are in your knowledge and we will help you write your action plan.
- The only way to get better at maths is to do more of it. Practice papers and questions are the best way to revise once you have nailed your specific target topics. We are following the AQA linear 8300 course.
- Get hold of a revision guide and workbook. These can be purchased from the front office for £3 each or speak to Mrs Griffiths.
- We will be running regular sessions after school (Mondays) and also **during holidays**, so keep an eye out for when these are and make a commitment to attend.
